

Nature Craft
Hammered Flower Print

You will be surprised at how real flowers share their colors when you hammer them onto fabric or paper. Parental supervision recommended.

What you'll need:

- * Paper towels
- * Waxed paper
- * Hammer
- * Flowers
- * Paper or white T-shirt or plain apron

How to make it:

1. Take the stems off the flowers and lay them face down out on whatever you are hammering them on to. Place a paper towel under the top layer of the t-shirt so the color won't soak through to the back.
2. Put a piece of waxed paper on top of the flowers.
3. Hammer the flowers until they are flat.
4. Carefully peel off the waxed paper and remove the petals that remain.
5. If you made a t-shirt or apron, soak it in salt water to make it permanent.
